

MARIE comprises 20 electrical engineering research projects in Germany working together towards a common vision: precisely and dynamically characterize and localize materials of our daily life surroundings using high frequency electromagnetic waves.

Solidarity with Ukraine

We stand with Ukraine! We would like to express our solidarity with the people of Ukraine and offer support to scientists who need to escape their homes as a result of the current military conflict. **MARIE** provides funding for Ukrainian scientists for up to 6 months in one of our research groups. We provide funding for scientists of all career levels, from graduate students to visiting professors.

How we will support you

- Travel costs and a monthly rate for accommodation and living costs for a duration of up to 6 months are covered.
- You will be part of a leading research environment in electrical engineering.
- You will be offered access to **MARIE** lectures, university courses and other possibilities for your personal development.

What you bring into MARIE

- You have the Ukrainian citizenship and had to leave Ukraine due to the current crisis.
- You are a student or a researcher in electrical engineering, physics, or a related discipline.
- You are interested in **MARIE**'s research field of mobile material characterization and localization.

Are you interested in joining **MARIE**? Go to www.trrmarie.org for more information on our research and structure. To apply, please send your CV and a short outline of your potential research within **MARIE** to munisch.wadwa@uni-due.de. If you have questions do not hesitate to contact us!
